NEW PRECIOUS TIPS FROM OUR LEADING SALONS FOR FALL ...

This week Salon Trichomania in Prague and Salon Roman Thomaskamp in *Zürich* and Bocholt share with you their tips to have beautiful hair during the fall season! With this guidance from all around the world express your personality through your hair!

SALON TRICHOMANIA RECOMMENDATIONS

OUR FALL HAIRCARE TIPS

After summer your hair is often damaged and your hair color faded. Your hair needs a cocktail to fix it!

Olaplex products are a good way to repair your hair damage.

Our recipe is ... 90ml of conditioner + 8g of colored pigments soluble in water + 10ml of Olaplex No1. Apply this mixture on very spun hair after the shampoo and leave in a plastic wrap covered by a bath towel during at least 30 minutes.

You should also prefer water-based coloring than chemical coloring containing ammonia or peroxide for instance.

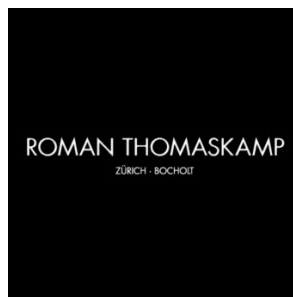

OUR FAVORITE FALL HAIRSTYLES

For fall you may like to turn for golden, copper red or violet colors.

Our current haircuts collection can be defined as "sharply tailored classic haircuts, tempered with an undercurrent of punk spirit".

OUR FALL HAIRCARE TIPS

For fall, we advise to take care of your hair with Olaplex products. You can either use it in the coloring to prevent your hair from damages and make the pigments more colorful or alone to repair your hair.

You might also like to use Shu Uemura products and especially the product range "Color lustre" to keep your hair color beautiful between the appointments at your hairdresser's.

OUR FAVORITE FALL HAIRSTYLES

Even if a new season means new trends you have to keep in mind that a good hairstyle is a hairstyle that suits you. Your hair color need for instance to suit your skin tone.

Warm colors will be in the limelight this fall: blond, brown, red or black shades choose the one that highlights your skin tone!

Our favorite haircuts for this fall are:

- A long bob with a natural hair color and your hair part in the side like Rosie Huntington-Whiteley.
- Medium long hair with darker roots and iridescent lengths and tips.
